

WALRUS®

PW-A Series 60Hz Submersible Pump

ISO 9001

Application

1. Water circulating of ponds
2. Lawn sprinkling
3. Garden watering and car washing
4. Dewatering the basement
5. Trenches
6. Excavation and construction sites

Features

1. Motor with built-in temperature protection.
2. Sturdy composite construction and glass-filled polypropylene housing resist corrosion.
3. Efficient cooling design keeps motor running cooler for longer life.
4. Compact size and light weight fit into out of the way places.
5. The "R" type available to used in sea fish breeding.
6. The "C" type equipped level regulator.
7. The "D" type low suction capability up to 1.2".

Specifications

1. Power supply: single-phase 60 Hz
2. Power: 100W to 400W
3. Insulation class: B
4. Protection: IP68
5. Length of cable: 13 ft or 16 ft
6. Delivery: up to 68.6 GPM
7. Head: up to 32.8 ft

Suitable Liquids

1. Suitable to pumping clean, non-aggressive water and slightly dirty (grey) wastewater.
2. When pumping salt water such as sea fish bleeding, please select PW100AR and PW400AR.
3. Temperature of pumped liquid: 39.2°F to +95°F
